Providing Your Total
3000 Needs

Resource 3000

Resources for 3000 users have been dwindling rapidly. Four companies renowned within the HP community created Resource 3000 to address this need. By combining our talents and decades of 3000 experience, we offer the only one-stop source for 3000 hardware and software support, system back-up, and performance solutions, and consulting services.

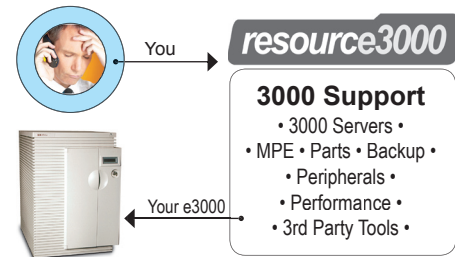

resource3000

Who is Resource 3000?

Resource 3000 was formed through the joining of **Allegro Consultants**, **Ideal Computer Services**, **ORBiT Software** and **Lund Performance Solutions**. Our four companies, together as Resource 3000, have more 3000 experience than anyone.

Resource 3000 was created to be the single source for all your 3000 requirements. We understand the investment you have made in your 3000 system and your need to continue its use. We can help manage your 3000, so that you can manage your business. We are committed to the community of 3000 users worldwide. For as long as you want to use your 3000 system, we will be here.

Why Resource 3000?

In 2001, HP shocked the 3000 community with its announced withdrawal from the market. In 2005, Resource 3000 is filling the gap - now and will into the future. We want to provide you with all your 3000 needs for as long as your business has the 3000. Our innovative approach brings unique capabilities to the market at a time when other companies are leaving the field:

- Rebuilding the 3000 community
- Expanding 3000-certified staff and support resources
- Building direct relationships with third-party software vendors
- Centralizing software distribution and support contracts

We want one call to do it all for you—everything you need for your 3000-driven business. For you and your 3000, it's business as usual, but with a twist:

Lower costs, improved service.

Resource 3000: Built for the 3000 Community

You Make One Call. We Do The Rest.

Benefits You Can Measure

Free to conduct your business — many of your most important business applications are built on the 3000. Changing systems now is not only exorbitantly expensive, but also highly disruptive to your business. Even with a well thought out and executed migration, changing systems will divert your attention, capital and resources away from your business towards technology.

Critical systems remain up and running — your risk to do business on the 3000 has just been reduced. Through Resource 3000, support for any 3000 need is just a phone call away. We'll even let you know when important parts for your system are in short supply, enabling you to manage your system before it affects your business.

Cost management improves — with the knowledge that your 3000 system is now supported for years to come, you no longer have to rush into hasty support or migration decisions. With Resource 3000, a company committed to the 3000 for the future, your organization can have affordable maintenance and even a growth plan. Further, you can develop migration plans on your time schedule for better, more affordable results, reducing your present and future capital costs by as much as millions of dollars.

Business Driven, Not Technology Encumbered

Resource 3000 changes your business landscape. You are now able to laser-focus on the needs of your business without worrying about unsupported systems inhibiting your productivity and growth. Resource 3000 immediately changes your reliance on diminishing resources.

Everything You Need For Your 3000

HARDWARE

- Refurbished servers and peripherals
- HP and compatible memory
- Tape drives and printers
- Disaster recovery

HARDWARE SUPPORT

Resource 3000 provides dedicated, international support for your 3000 systems. Our hardware support is tightly integrated with our MPE, performance, and third-party support, giving you the first true one-stop shop for 3000 systems.

MPE SOFTWARE SUPPORT

Whether it's help using a utility, analyzing the cause of a system abort, or reading a memory dump, we provide A to Z support for all versions of MPE, including MPE V. We'll train you, provide custom programs, or help tune your system.

CONSULTING SERVICES (ON-SITE & OFF-SITE)

With Resource 3000, you have experience at your strategy table. We offer consulting for performance, IT management, site specific (on and off site), as well as system performance reviews and capacity planning.

BACKUP SOLUTIONS

Nobody does it better, or makes it easier for you to store and recover your precious data — when you need it. We provide backup hardware and software solutions for all standard 3000 backup devices, including Ultrium.

PERFORMANCE SOLUTIONS

We have the tools and the experience to help you keep your system running at optimum performance, saving you money and time.
